

SORBUS VECTOR

31 August 2022

The fund objective is sustained capital and income growth. This is to be achieved by investing in companies that possess durable business franchises with a competitive advantage, thereby producing long term growth in earnings and what we define as strong real cashflow i.e. cashflow after all capital expenditure. The fund is in the UK All Companies sector and though it has a historical bias toward small and mid cap companies, it can invest across the market capitalisation range depending on where the managers identify opportunities. Our distinctive process has been developed over 30 years of market experience using a high conviction approach with generally no more than 25-30 holdings and a buy/hold strategy with relatively low turnover. We also have the proven skills to add value via strategic board interventions where necessary and this has been successfully demonstrated in the past.

SUSTAINABILITY

The SORBUS investment philosophy has always been focused on the long term, seeking sustainable advantage and to minimise risk. Our portfolio construction is entirely bottom up and sector/index neutral, all investments are selected on their own merits. Companies which are poor global citizens and pursue policies that have a negative impact on environmental, social and governance issues are unlikely to be successful long term investments and therefore would not qualify for investment by SORBUS VECTOR.

Disclaimer: SORBUS PARTNERS LLP is registered in England and Wales with company number OC378465 and is authorised and regulated by the Financial Conduct Authority (FRN 588466). The information contained in this document is provided on a strictly confidential basis and does not constitute an offer to sell or solicitation of an offer to buy this fund, nor is it advice or a recommendation to enter into any transaction.

The value of investments and the income from them may fall or rise and investors may get back less than they invested. Past performance is no guide to future returns. Any investment in smaller companies is speculative and involves a high degree of risk as many smaller companies securities can be illiquid or "thinly traded", which tends to increase price volatility. Illiquid securities are often difficult for investors to buy or sell without dramatically affecting the quoted price. In some situations the liquidation of a position in a smaller company security may not be possible within a reasonable period of time. There can be no assurance that the information provided on this page is accurate or error free. Any user of such information expressly assumes all the risks from using this information.
