

SORBUS VECTOR

28 February 2025

The fund objective is sustained capital and income growth. This is to be achieved by investing in companies that possess durable business franchises with a competitive advantage, thereby producing long term growth in earnings and what we define as strong real cashflow i.e. cashflow after all capital expenditure. The fund is in the UK All Companies sector and though it has a historical bias toward small and mid cap companies, it can invest across the market capitalisation range depending on where the managers identify opportunities. Our distinctive process has been developed over 30 years of market experience using a high conviction approach with generally no more than 25-30 holdings and a buy/hold strategy with relatively low turnover. We also have the proven skills to add value via strategic board interventions where necessary and this has been successfully demonstrated in the past.

SUSTAINABILITY

The SORBUS investment philosophy has always been focused on the long term, seeking sustainable advantage and to minimise risk. Our portfolio construction is entirely bottom up and sector/index neutral, all investments are selected on their own merits. Companies which are poor global citizens and pursue policies that have a negative impact on environmental, social and governance issues are unlikely to be successful long term investments and therefore would not qualify for investment by SORBUS VECTOR.
